SUBJECT INDEX.

A

Accidents, Notification of, 51
Acid-Resistant Cast Iron, 186.
Acid-Resisting Alloys, New Developments in, 458.
Air Blast, Measurement of the Cupola, 121.
Alloy Cast Irons, 45.
Alloy Cast Irons, Potentialities of, 107.
Alloy Chilled Rolls, Machining of, 304.
Alloy Iron, Nickel-Chrome, 254.
Alloy, The Economic Manufacture of the Y-, 265.
Alloys, Aluminium-Silicon: Their Properties and Some Applications, 29, 49, 87.
Alloys, New Developments in Acid-Resisting, 458.
Alloys of Iron, The Elimination of Sulphur from, 465.
Alloys: Past, Present and Future, 139.
Alloys, The Importance of Design and Setting of Large Kettles used for Refining and Low Melting-Point, 255.
Aluminium and its Alloys, An Open-Flame Stationary Hearth-Type Furnace for Melting, 357.
Aluminium as a Decorating Medium, The Use of, 101.
Aluminium Paint on Cruisers, Use of, 396.
Aluminium-Silicon Alloys: Their Properties and Some Applications, 29, 49, 87.
America in 1928, Blast-Furnace Development in, 158.
American Exchange Paper, 122.
American Foundry Practice, 441.
American Hot-Blast Cupola Plant, 309.
Annealing of Cast Iron, 229, 251, 292.
Apprentice, The Training of a Foundry, 286.
Apprenticeship Problem, The Foundry-, 85.
Arc Welding in Foundries, Electric, 456.
Automobile Engines, Cast Iron for, 204.

B

Balance-Sheet, The, 330.
Blast-Furnace Development in America in 1928, 158.
Blast-Furnace Practice in Germany, 112.
Blast-Gate Control for Cupolas, Automatic, 65, 91.
Blast, Measurement of the Cupola Air, 121.
Boilers, Utilisation of Coke Breeze for Steam, 312.
Brass, Melting Light Yellow, 180.
Breeze for Steam Boilers, Utilisation of Coke, 312.
British Facilities for Foundry Training, 163.
British Steel Foundry and its Position To-day, 44.
Bronzes, Practical Points from the Metallurgy of Cast, 474.
Buchanan Medallist, Scottish, 484.

C

Cadmium and its Uses, 43.
Carbon Content, Constant, 385.
Carbon of Cast Iron during Melting, The Change of the Total, 327.
Casting, Freak Waster, 382.
Casting Gun Metal, 175, 192.
Casting, Scottish Moulding Sands and their Application to Non-Ferrous, 143.
Castings, Chilled, 339.
Castings, Defective Steel, 256.
Castings in Relation to Tests, Design of Engineering, 67, 132.
Castings, Metallurgy of Steel, 25.
Castings, Patterns for Steel, 129.
Castings, Production of Malleable, 33.
Castings, Shrinkage Holes in Small Grey Iron, 27.
Castings, Symposium on Steel, 53, 72, 105.
Cast Bronzes, Practical Points from the Metallurgy of, 474.
Cast Iron, Acid-Resistant, 186.
Cast Iron, Annealing of, 229, 251, 292.
Cast Iron, Cheaper and Better, 213, 249.
Cast Iron, Development of High-Duty, 83.
Cast Iron during Melting, The Change of the Total Carbon of, 327.
Cast Iron for Automobile Engines, 204.
Cast Iron, Influence of Chromium in, 489.
Cast Iron, Influence of Copper upon, 386.
Cast Iron, Influence of Nickel and Chromium upon the Growth of Grey, 156.
Cast Iron, Influence of Nickel-Chromium on, 5.
Cast Iron, Influence of Some Elements on the Growth of, 122.
Cast Iron, International Test-Bar for, 318.
Cast Iron, Relationship between the Compression and the Transverse Strength of, 308.
Cast Iron, "Shear Test" not a Satisfactory Test for, 247, 273.
Cast Iron, Sponginess in, 362.
Cast Irons, Alloy, 45.
Cast Irons, Potentialities of Alloy, 107.
Cast Irons and Quenched Steels, Constitutional Diagrams for, 375, 397.
Cast Steel containing Chromium and Nickel, High-Quality, 383.
Charging, Novel Method of Cupola, 159.
Chilled Castings, 339.
Chilled Rolls, Machining of Alloy, 304.
Chrome Alloy Iron, Nickel-, 254.
Chromium and Nickel, High-Quality Cast Steel containing, 383.
Chromium Compared, Delicate Tests for, 406.
Chromium in Cast Iron, The Influence of, 489.
Chromium Plating for Resisting Wear, 44.
Chromium upon the Growth of Grey Cast Iron, The Influence of Nickel and, 156.
Clarke, Chapman & Company, Limited, Works of, 3.
Coal-Dust as Applied to Moulding Sand, 493.
Coal-Dust Rotary Furnace *versus* the Cupola for the Production of High-Quality Malleable Iron, 257.
Coke Breeze for Steam Boilers, Utilisation of, 312.
